Elasmobranch (sharks and rays) Research Field Skills Course

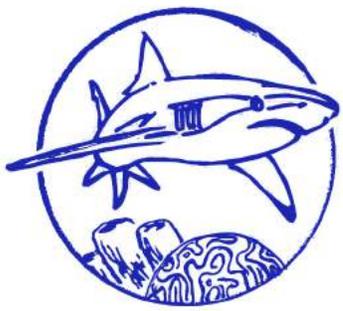

Passionate about sharks? Get the experience you need to be competitive for internships, graduate school and the job market.

Course includes in-depth instruction and hands-on research experience with shark handling and workup procedures, data and morphological measurement collection, techniques for minimizing shark capture stress, experimental design, a variety of common fishing methods.

Courses are taught by credentialed, experienced field scientists and all work contributes to ongoing research projects.

Preparing for your course

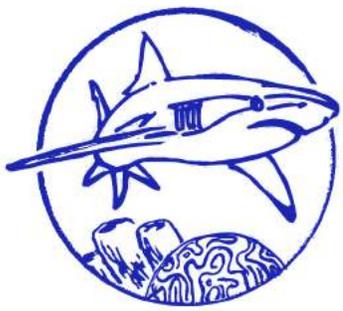

FLIGHTS

Each course begins onboard the boat at 11 am the first day of the trip (though we will not be leaving dock before 4 PM, so if you must arrive a bit later we can usually make that work). The course will formally end at 3 pm on the last day, although we will plan to return to dock by noon. We advise booking flights no earlier than 5 PM that evening to give you some safety margin on our exact return time. If you are not sure about which flights to purchase, feel free to reach out to us. Once you have purchased flights, please send us your travel itinerary.

TRAVEL INSURANCE

South Florida summers are beautiful, but are occasionally known for hurricanes and other unpredictable weather events. Our boat is freshly retrofitted and carefully maintained, but engine failure or other unexpected mechanical problems can occur. We strongly recommend that you purchase travel insurance in the event that the course needs to be cancelled, which is extremely unlikely but never impossible. If this happens you will of course receive a full refund for your course fees and we will provide you with the necessary documentation for receiving a refund on your flights.

Preparing for your course

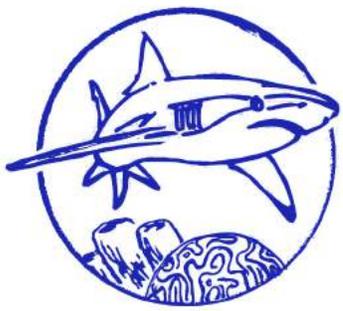

MEDICAL INSURANCE

We require that all participants in the course carry supplemental medical travel insurance. This is inexpensive and protects you and your family financially in the event of unexpected illness or injury.

It is often possible to combine travel/flight coverage with medical insurance for a trip, and comprehensive insurance coverage usually costs between \$100 and \$150. Diver's Alert Network (www.diversalertnetwork.org) and companies like Allianz are worth considering for this purpose, although you are welcome to use whatever insurer you wish.

Field School staff are trained to respond in the event of a medical emergency, and we do have a first aid kit on board for student use that contains essentials, but we also strongly encourage you to bring ibuprofen, seasickness tablets (we recommend bonine) and any other medications you may need, in addition to any necessary prescription medication. **If you have serious allergies or other medical conditions that may impact your safety and well-being while on the boat, please let us know.**

What to pack

The R/V Garvin is a working Research Vessel, and so storage onboard and in sleeping quarters is at a premium. As such it is very important that you pack light and focus on essentials. In addition to essentials like toiletries, medications, and undergarments, we recommend the following:

Functional swim wear (2-3)

Shorts (2-3)

Shirts (2-3)

Rashguard or wetsuit (1-2)—you'll be snorkeling and a shirt/wetsuit can help keep you warm in the water, avoid jellyfish stings, and prevent sunburn

Windbreaker/rain jacket (1)

Pants, preferably of a fast drying material (1)

Light long-sleeved shirt (1)

Shoes: one pair of sandals and (required) one pair of close-toed rubber-soled shoes that you can securely attach to your feet

2 towels (1 beach towel/ 1 shower towel)

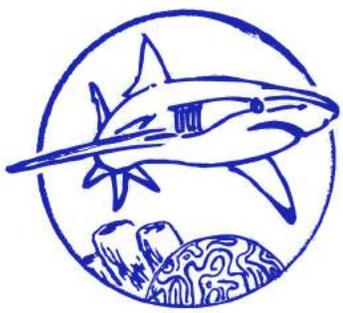

Snorkel, mask and fins (if you have not opted to rent from us)

Sunglasses (polarized preferred) and hat

Sunscreen (We have some onboard but we cannot stress this enough - people often underestimate the strength of the Florida sun)

Earplugs/eyemask, especially if you have difficulty sleeping with background noise—boat engines are not that quiet!

A few other things to keep in mind when packing

All together everything should fit inside a larger backpack or small duffel bag. Hard or rolling suitcases are not recommended as there isn't a lot of space to store them and they're less convenient in the confines of a boat than smaller, more flexible bags.

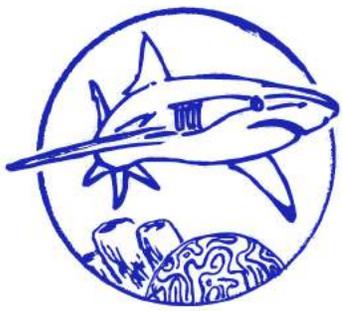

You want to bring clothing that is comfortable for you to move and work in, and that you do not mind getting dirty (i.e., possibly ruined). Remember that we will also have a field shirt for you when you arrive, one of which is yours to keep as part of your trip. Additional field shirts are also available for purchase.

Things we need from you

1. Signed and completed waivers (which will be sent out to you in May/June)
2. Dietary information, if any (vegetarian, vegan, allergies)
3. Medical information, if any (relevant medical conditions, allergies)
4. Flight and travel details
5. Proof of travel emergency medical insurance
6. Shoe size (only if you are renting snorkel gear from us)

A few frequently asked questions

Who may participate in this course?

Generally this course is for students 18+ though we will make some exceptions for mature 17 year old students. Please sign up for our newsletter to hear about upcoming opportunities for younger students. There is no upper age limit on this course. We often host students who are changing careers or expanding their training for graduate school.

Can I receive course credit?

Field School does not offer credit directly, but we are happy to provide whatever documentation your institution requires so that you may receive credit for independent study.

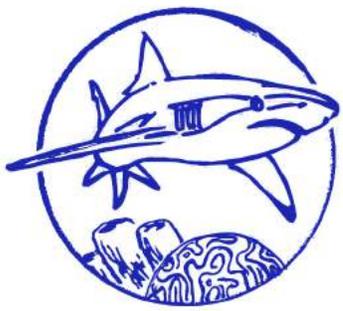

What species will we see and work with?

The array of collection techniques used during the course means we see a wide variety of species ranging from small bonnetheads to large bull sharks. Species caught may include Atlantic sharpnose, lemon, sandbar, bull, nurse, blacktip, bonnethead, tiger, hammerhead, southern stingray, and many more.

How much money will I need for the one dinner out?

Although we work hard to keep you well fed during the week, we like to give our students the opportunity to experience some of the local culture. The dinner out is held at a locally owned and operated restaurant and price for dinner can easily be kept in the \$15-20 range.

How to find us

The RV Garvin is docked at Rickenbacker Marina and is easily accessible by taxi, Uber/Lyft, or public transportation from Miami International Airport. You may also want to check Ft. Lauderdale International Airport, which from some destinations can be considerably less expensive. Public transit and van share options are available to Miami at relatively low cost.

Once you arrive at the Garvin call our main line at (305) 925-0805 and press 0.

Someone from our crew will meet you in the parking lot and will escort you to the RV Garvin.

If you are driving and need to park on site just let us know and a parking pass will be provided.
